

LCD 90 UV - Curing light

Ultimate, small and powerful curing light LED with built-in power supply and controls.

LCD 90 has a built-in, timer-controlled constant current generator, which runs a high-efficiency (3W) blue light diode/UV diode. The dominant wavelength for the **LC 90 UV** is approx. 400 nm.

LCD 90 is mainly for unit use but is also available with a battery pack for stand alone use.

LYSTA

Approx 200 mW/cm² and a dominant wavelength of 395-400 nm (blue light).

Weight of handpiece: 53g Lens: 5mm

Power supply: 15 - 24 VDC
